Dear Hiring Manager,

My name is Nyan Tun Zaw, an ICT student in my final semester at Rangsit University, driven by curiosity, creativity, and a strong passion for technology and design. I'm applying for your program because I believe it is the perfect place for me to grow, contribute, and transform ideas into meaningful digital experiences.

Throughout my academic journey, I have built a solid foundation in IT support, networking, system tools, and data management. Alongside these technical skills, I discovered my creative side—designing intuitive user interfaces, building clean wireframes, and crafting interactive prototypes with Figma and Adobe XD. I also enjoy working with animation, Digital marketing, and digital design, bringing concepts to life through visuals, motion, and storytelling.

What excites me most is the intersection between technology and creativity. Whether solving a technical issue, organizing data, or designing an engaging screen, I enjoy creating solutions that are both functional and visually appealing. I work well in collaborative environments, adapt quickly to new tools, and always strive to learn something new every day.

I am confident that your internship program will allow me to contribute my knowledge, creativity, and energy while gaining real-world experience that will help shape my career. Thank you for considering my application—I look forward to the opportunity to bring my passion and ideas into your team.

Warm regards,

Nyan Tun Zaw

PROJECTS

- **Hotel Management & Development (Website)**

* Co-operated with team, Managed and Handled coding, design and maintenance web.

Clients: School Projects, Companies Social Media Platform

Result: Improved my opportunities, skills and knowledge.

- **Product Development**

* 13 guides' Web design and Development, Social Media, and Maintenance all pages.

Controlling Qualities, and planning & strategies with Teams.

Clients: MMRD (Myanmar Marketing Research & Development Co. Ltd.)

- **Game design and Animation**

*Develop 3D modelling games like temple run but i develop TommyRunner (This is my game's name). And then, draw character's design and in game design. Using Unity and VS code and Other apps/tools. This is the project in Rangsit's University. Did it individually.

- **Data entry & Analysis**

I completed a Data Entry & Analysis project where I was responsible for collecting, organizing, and validating large datasets from multiple sources. My tasks included accurately entering data into spreadsheets, cleaning and formatting information, and using basic analytical tools to identify trends and inconsistencies. I also generated summary reports and visual charts to support decision-making. This project strengthened my attention to detail, accuracy, time management, and proficiency in applications such as Microsoft Excel and Google Sheets.

And then, using SQL and Ai tools.

- **Intelligent system (AI)**

Using google colab, Figma and Ai tools for that. And then, making ABMS and algorithm for class's Project at Rangsit University. Learn about Formula and method of ABMS / Mathematical format.
